

Welcome to our best performing, most foodsafe cabinet yet

EcoPro G3 cabinets

The next generation of professional refrigeration is here

- With G3, you get the best of both worlds: high performance coupled with low energy consumption, from the Refrigeration Experts.

- The third generation of EcoPro, the G3 cabinets are loaded with reliability, energy-saving, food safety and hygiene features.

PURECONTROL

The controller display uses pure LEDs incorporating InGaN technology, meaning it achieves **higher resolution, lasts longer, all while using less power.**

A GRADE EP700H MODEL

Huge **market-leading capacity**, with four shelves as standard on single door cabinets, maximising usable space.

304 is the **gold standard in performance stainless steel** with Foster's unique polishing system meaning that the heaviest touchpoints in a kitchen are covered.

The redesigned **+STAYCLEAR** condenser means **little maintenance** and **incredible efficiencies** across the entire range.

Foster Shield means you can rest assured, that from advanced temperature control to hygienic design, you're protected from the dangers of unsafe food storage.

Designed using 'CFD' modelling: a **cutting edge technology used in Formula 1 and aerospace industries** to track movement of air, ensures food stays fresher for longer.

Delivered with **lockable castors** fitted as standard, giving you full mobility for easy access around the unit. Once in position, you can be sure it will stay there.

Interest-free credit available over 24 months **ZERO%** (UK only)

Packed full of innovation for the most demanding kitchens

Versatile

With the G3 Short, cabinets can fit through standard doorways without tilting, making them suitable for low ceiling applications.

Future-proofed

Through the simple addition of a gateway, you're connectivity-ready, providing a HACCP temperature data solution, energy consumption information, and the facility for equipment management.

Durable

Full length ladder racks offer increased weight loading for shelves. Racking system and door gaskets are removable for ease of cleaning.

Perfect for hot kitchens

Operates efficiently in ambients up to 43°C (exceeds ISO Climate Class 5), meaning G3 is proven to work in the hottest of kitchen environments.

Foster Shield ensures that you are protected from the dangers of unsafe food storage. With a refrigeration system re-engineered using CFD technology for astounding temperature control, and an improved design making the G3 our easiest refrigerator to clean, this is our most foodsafe product yet.

PURE CONTROL

The G3's controller display uses pure LEDs, incorporating InGaN technology, which means it achieves higher resolution, lasts longer - all while using less power.

The white characters are 33% larger, with sharper definition which can be viewed from a 180-degree angle, meaning chefs can see the temperature of their fridge at a glance from almost anywhere in the kitchen.

+ STAYCLEAR SC

We've developed a brand-new version of our award-winning +stayclear condenser, which is now an integral part of the entire G3 cabinet and counter range.

This smart, low-maintenance component ensures that not only is your G3 saving energy on its first day in your kitchen, but it keeps up a high level of performance over time.

In addition to what's already been covered, the G3 specification offers you so much more than meets the eye...

Performance, Reliability and Quality

- Reinforced 5mm stainless hinges at the top and bottom of the door for added durability and to eliminate the risk of door sag (tested to 250,000 openings, equivalent to ten years' usage).
- Cutting edge technology fibre optic laser used in manufacturing provides more precise joins for enhanced product quality, performance and hygiene.
- The top fascia panel featuring 'Airlines' ventilation system keeps the refrigeration system cool and efficient.
- The anti tilt heavy duty racking system, with each shelf capable of holding 40kg, is fully secured into the rear air duct. When extra strength shelves are needed, we offer the option of extra heavy duty shelving capable of holding 60kg.
- Self-closing doors help to maintain consistent storage temperature.

Energy Efficiency and Sustainability

- Low carbon footprint - 'natural' Hydrocarbon refrigerant, low energy consumption, through to product longevity and recyclability means the EcoPro G3 will help your business reduce its carbon footprint.
- High-performance Cylopentane foam which is more thermally efficient, maintains its insulation performance longer than traditionally used foams.

Value

- Market leading capacity - get 'more fridge for your money': up to 54 litres of additional space compared to the storage capacity of an average competitor – that's the equivalent of 198 x 250g packs of butter!

Hygiene & Safety

- Ergonomic one piece door handle design for ease of opening and cleaning.
- Hygienic and contactless magnetic fan cut-out door switch with no moving parts.

Please note – non-standard product dimensions and temperatures can be found in the price book

Interest-free credit available over 24 months **ZERO** (UK only)

* Glass door ambient H temp 32°C, NB: Fish model requires a drain
** Based on standard specification. Full energy listings available at fosterrefrigerator.com.

 Featured options

Stainless steel back for island siting

Helicoil mains lead

GN 2/1 nylon coated shelf

GN2/1 stainless steel shelf

Anti tilt stainless steel trayslides

NB: Please specify all options required at the time of ordering

Also:

- 220/60/1 electrical supply**
- Remote (less condensing unit)**
- 150mm legs in lieu of castors**
- Left hand hinged door(s)**
- Extra heavy duty shelving**
- Marine option***
- Bottle rack (140 bottle capacity)***
- 60x40cm Bakery rack (excludes trays)***

* only available on EP700 models
