# We're known as The Refrigeration Experts for a reason...

**We've been manufacturing commercial refrigeration in Britain since 1968**, and our products can be found in 116 countries and counting.

**Our interest-free credit scheme is market-leading**, giving you the option to spread payment over 12, or 24 months at a rate of 0% – all while its working for you and we offer a 3 month payment holiday!\*

**Aftersales isn't an afterthought** – with everything from expert technical support to 24/7 online parts ordering, it's not only our refrigeration that you can rely on.

**+STAYCLEAR**

**Innovation is at our core**, like our award-winning +stayclear condenser - a great example of how we're always looking to raise the bar in refrigeration.

**We're proud to be a British manufacturer** – our world class manufacturing and in-house testing facility is based in King's Lynn, Norfolk.

**Expert help where and when you need it** – free of charge site surveys and local product training are just part of our commitment to making life easier for our customers.\*

**We hold ourselves to the highest standards:** Foster are accredited to ISO 14001:2015, the recognised international standard in Environmental Management Systems, and ISO 9001:2015 the benchmark for Quality Management Systems.

**We're committed to carbon reduction,** holding the Carbon Trust Standard for over a decade.

**We're part of ITW, a Fortune 250 company.** A world leading manufacturer with a \$2.6 billion food equipment division specialising in refrigeration, warewash, cooking and service – so whatever your need, ITW has you covered!

\*UK only.

A chef with a beard and glasses, wearing a dark t-shirt and a grey apron, is holding a large rack of ribs. He is looking down at the ribs with a focused expression. The background is a professional kitchen with stainless steel shelves and equipment. The lighting is warm and focused on the chef and the ribs.

## Complete Refrigeration Solutions

Foster is synonymous with professional refrigeration, and we have products for every stage of foodservice; from storage to prep to the cookline and back to storage.

**FOSTER**

# Types of Refrigeration

## Display

From convenience stores and cafes to bakeries and supermarkets, there is a need to display your refrigerated goods in an appealing manner to maximise your sales.

[Click here](#)

## Process

From blast chillers to controlled thaw, Foster offers a range of process products to meet the exacting needs of your commercial kitchen, maximising the condition, taste and texture of your food, before and after it reaches the cookline.

[Click here](#)

## Coldstores

For large capacity refrigerated storage convenience, Coldrooms can be installed inside the kitchen, or if space is at a premium, outdoor to allow the kitchen to be prioritised for preparation.

[Click here](#)

## Prep

Take the travel out of preparation by having your ingredients right where you need them. Ergonomically designed units allow for faster access to items such as pizza toppings and sandwich fillings.

[Click here](#)

## Front of House

From bottle chillers to keg coolers, we have your front of house requirements covered with Gamko's bar refrigeration.

[See Gamko section](#)

## Storage

The foundation of the professional kitchen. From Gastronorm cabinets and counters to the convenience of Slimlines and Undercounters, Foster has the solution for you.

FOSTER

# EcoPro G3 cabinets

The next generation of professional refrigeration is here

- With G3, you get the best of both worlds: high performance coupled with low energy consumption, from the Refrigeration Experts.

- The third generation of EcoPro, the G3 cabinets are loaded with reliability, energy-saving, food safety and hygiene features.

## PURECONTROL

The controller display uses pure LEDs incorporating InGaN technology, meaning it achieves **higher resolution, lasts longer, all while using less power.**

**A GRADE** EP700H MODEL

Huge **market-leading capacity**, with four shelves as standard on single door cabinets, maximising usable space.

304 is the **gold standard in performance stainless steel** with Foster's unique polishing system meaning that the heaviest touchpoints in a kitchen are covered.

The redesigned **+STAYCLEAR** condenser means **little maintenance** and **incredible efficiencies** across the entire range.

**Foster Shield** means you can rest assured, that from advanced temperature control to hygienic design, you're protected from the dangers of unsafe food storage.

Designed using 'CFD' modelling: a **cutting edge technology used in Formula 1 and aerospace industries** to track movement of air, ensures food stays fresher for longer.

Delivered with **lockable castors** fitted as standard, giving you full mobility for easy access around the unit. Once in position, you can be sure it will stay there.

Interest-free credit available over 24 months **ZERO%** (UK only)

## Packed full of innovation for the most demanding kitchens

### Versatile

With the G3 Short, cabinets can fit through standard doorways without tilting, making them suitable for low ceiling applications.

### Future-proofed

Through the simple addition of a gateway, you're connectivity-ready, providing a HACCP temperature data solution, energy consumption information, and the facility for equipment management.

### Durable

Full length ladder racks offer increased weight loading for shelves. Racking system and door gaskets are removable for ease of cleaning.

### Perfect for hot kitchens

Operates in ambients up to 43°C, meaning G3 is proven to work in the hottest of kitchen environments.

Foster Shield ensures that you are protected from the dangers of unsafe food storage. With a refrigeration system re-engineered using CFD technology for astounding temperature control, and an improved design making the G3 our easiest refrigerator to clean, this is our most foodsafe product yet.

### PURECONTROL

The G3's controller display uses pure LEDs, incorporating InGaN technology, which means it achieves higher resolution, lasts longer - all while using less power.

The white characters are 33% larger, with sharper definition which can be viewed from a 180-degree angle, meaning chefs can see the temperature of their fridge at a glance from almost anywhere in the kitchen.

### +STAYCLEAR SC

We've developed a brand-new version of our award-winning +stayclear condenser, which is now an integral part of the entire G3 cabinet and counter range.

This smart, low-maintenance component ensures that not only is your G3 saving energy on its first day in your kitchen, but it keeps up a high level of performance over time.

## The G3 cabinet range

ECO PRO  
**G3**

At a glance

Standard

Glass door

Half doors/Dual Temp

Fish

Short

Double door

## In addition to what's already been covered, the **G3 specification** offers you so much more than meets the eye...

### Performance, Reliability and Quality

- Reinforced 5mm stainless hinges at the top and bottom of the door for added durability and to eliminate the risk of door sag (tested to 250,000 openings, equivalent to ten years' usage).
- Cutting edge technology fibre optic laser used in manufacturing provides more precise joins for enhanced product quality, performance and hygiene.
- The top fascia panel featuring 'Airlines' ventilation system keeps the refrigeration system cool and efficient.
- The anti tilt heavy duty racking system, with each shelf capable of holding 40kg, is fully secured into the rear air duct. When extra strength shelves are needed, we offer the option of extra heavy duty shelving capable of holding 60kg.
- Self-closing doors help to maintain consistent storage temperature.

### Energy Efficiency and Sustainability

- Low carbon footprint - 'natural' Hydrocarbon refrigerant, low energy consumption, through to product longevity and recyclability means the EcoPro G3 will help your business reduce its carbon footprint.
- High-performance Cyclopentane foam which is more thermally efficient, maintains its insulation performance longer than traditionally used foams.

### Value

- Market leading capacity - get 'more fridge for your money': up to 54 litres of additional space compared to the storage capacity of an average competitor – that's the equivalent of 198 x 250g packs of butter!

### Hygiene & Safety

- Ergonomic one piece door handle design for ease of opening and cleaning.
- Hygienic and contactless magnetic fan cut-out door switch with no moving parts.

# EcoPro G3 counters

The next generation of professional refrigeration is here

ECOPRO  
**G3**

- We offer a wide selection of EcoPro G3 counters to ensure you find the right option for you and your business.
- From drawer combination to saladette cut out counters, these high-performance professional refrigeration units are fitted with energy efficient, commercial grade components for maximum reliability and minimum cost.

## PURECONTROL

The controller display uses pure LEDs incorporating InGaN technology, meaning it achieves higher resolution, lasts longer, all while using less power.

Now featuring our award-winning next generation + **STAYCLEAR** condenser!

**A+ GRADE** EP1/2H MODEL

A reduced footprint – the more compact design of G3 counters **allow them to fit in the tightest of kitchen spaces** without losing capacity.

**250,000 counter variations** available for your customisation.

**Foster Shield** means you can rest assured, that from advanced temperature control to hygienic design, you're protected from the dangers of unsafe food storage.

**Works in hot kitchens**, operates to up to 43°C ambient.

Delivered with **lockable castors** fitted as standard, giving you full mobility for easy access around the unit. Once in position, you can be sure it will stay there.

Interest-free credit available over 24 months **ZERO%** (UK only)

## Packed full of innovation for the most demanding kitchens

### Innovative

G3 counters are fitted with the new and improved +stayclear condenser, meaning little maintenance required and incredible efficiencies.

### Future-proofed

Through the simple addition of a gateway, you're connectivity-ready, providing a HACCP temperature data solution, energy consumption information, and the facility for equipment management.

### Hygiene

304 is the gold standard in performance stainless steel and our unique polishing system means the heaviest touchpoints in a kitchen are covered.

### 'Airlines' ventilation system

Fascia panel featuring the 'Airlines' ventilation system for the refrigeration unit, means that your state of the art product looks great in any environment whilst keeping the refrigeration system cool and efficient.

### Durable

Cutting edge fibre optic laser technology used in manufacturing provides more precise joins for enhanced product quality, performance and hygiene.

### Food safe

Redesigned using 'CFD' modelling: a cutting edge technology used in Formula 1 and aerospace industries to track movement of air, ensures food stays safer and fresher for longer.

In addition to what's already been covered, **the G3 specification** offers you so much more than meets the eye...

- Low carbon footprint - 'natural' Hydrocarbon refrigerant, low energy consumption, through to product longevity and recyclability means the EcoPro G3 will help your business reduce its carbon footprint.
- Removable internal racking system and door gaskets for ease of clean.
- High-performance Cylopentane foam which is more thermally efficient, maintains its insulation performance longer than traditionally used foams.
- Self-closing doors help to maintain consistent storage temperature.
- Stainless steel dished liner base for a high quality, hygienic and easy to clean finish.

**New! 50mm reduction in width means G3 counters fit in the tightest of spaces without compromising on capacity!**

## Counter considerations

Before purchasing your counter, have you thought about:

- Where will your counter be situated? If it will be on a kitchen island, you may be interested in a stainless steel rear panel.
- Do you need splashbacks? The perfect option for preventing spillages behind the counter.
- Will the counter be situated underneath a fitted worktop? Counters can come with a less worktop configuration reducing the height by 28mm.

The Refrigeration Experts

# Gastronorm Roll ins

Roll in cabinets provide useful trolley loading refrigerated storage

- Stores large quantities of chilled or cooked food quickly and easily.

## Glass door option

A glass door allows you to see if the unit is in use, and what's on the trolley without having to open the door, saving you time in a busy catering environment.

## Industry leading design

Industry leading design offers the maximum storage capacity on the smallest possible footprint.

## Specifications

### Configurations

GRL1H

Dimensions (w x d x h) mm	865 x 940 x 2240
Trolley capacity	1 (GN2/1)
Refrigerator +1/+4°C	GRL1H

**S/S trolleys** (shelves not supplied)  
**- 20 GN 2/1 shelf positions**  
**- 20 GN 1/1 shelf positions**

NB: Please specify all options required at the time of ordering

Roll in refrigeration minimises food handling, **increasing the level of hygiene and food safety.**

A range of trolleys, shelves and pans are available.

Interest-free credit available over 24 months **ZERO<sup>†</sup>** (UK only) † Ecodesign Regulation does not currently apply to this product type, and therefore an energy grade cannot be shown

# Bakery

A range of specialist bakery equipment provides superb standards of reliability, hygiene and temperature control

- Provides ideal storage of all the ingredients required in a busy bakery.
- Refrigerator temperature between +1°C & +4°C suitable for high risk dairy products.

## Design

Cabinets and counter designed to take 30" x 18" trays

## Specifications

### Configurations

Dimensions (w x d x h) mm	650 x 962 x 2067
Bakery tray capacity (30" x 18")	14 (not supplied)
Refrigerator +1/+4°C	EP20BSR
Freezer -18/-21°C	EP20BSF

EP20

**Sophisticated airflow system** ensures even temperature and humidity throughout.

**Provides ideal storage** of the ingredients required in a busy bakery.

# Chest Freezers

Convenient frozen storage

- With all the quality characteristics associated with Foster products, these robust, large capacity chest freezers are finished in a white laminate exterior with aluminium interior and a stainless steel lid for increased protection.

## Control

Control panel with 'on' light, thermometer and quick freeze switch for simple control.

**GLOBAL  
COOLING**

Our forever pledge to the planet

The Refrigeration Experts

For efficient food preparation,  
store your ingredients close to hand.

Prep

# Prep

For when you need everything to hand

- Perfect food prep refrigeration whatever your operation, with fresh ingredients at your fingertips. So whether you're making pizzas, sandwiches, salads or desserts, you can minimise your kitchen processes whilst maximising your speed of service and profitability.

## Safe food storage

Gastronorm pans are recessed into the top to allow the optional hinged night cover to form a complete seal. This enables safe storage of food within the pans during service. Inclined for easy accessibility.

Our Prep Station has been designed with the operator in mind, **all pans and work bench height are within comfortable reach.**

**Clever inner catch tray** stops food from falling into the main storage area, quickening clean down times.

**The fan assisted, forced air system** delivers even temperature holding to both the counter base and top pan storage section.

**Energy-saving natural hydrocarbon refrigerant** as standard across the range.

**A raft of options available to suit your preparation requirements**, including drawer sections and 150mm deep gastronorm pan arrangements.

Experts in blast chilling  
and freezing since 1973.

Blast chillers and freezers,  
and controlled thaw.

**FOSTER**

# Blast chillers and freezers, and controlled thaw

The essential element to the commercial kitchen.

- Foster's Touchpad range maximises the condition, taste and texture of your food.

## Modular Blast Chillers

Huge range of large capacity modular blast chillers and freezers designed to cope with even the most demanding, high volume kitchens.

Designed to take most standard trolleys, chilling capacities from 75kg to 250kg, with occasional freezing on MBCFT models.

Our upgraded standard blast chiller models have the addition of an **occasional freeze capacity for ultimate flexibility**

Just press and go! Forget the confusion of other blast chillers with Foster's **intuitive user friendly control panel**

- **Clear colour coding** to indicate cycle status
- Automatically selected timed or probe chill/freeze options
- Automatic temperature hold on completion of cycle

The industry choice, since 1973 for meeting hygiene standards, **preserving the quality of your food and reducing food waste**

Process Refrigeration

304 stainless steel interior & exterior: the 'gold standard' in performance finishes meaning **quality is assured**

Exceed your quality expectations – **Blast chill** from +70°C to +3°C in 90mins with an entry temperature of up to 90°C – **Blast freeze** from +70°C to -18°C in less than 240 mins

## Roll in Blast Chiller

RBCT 20-60

Specific model to accept the Rational GN201 trolley with a chilling capacity of 60kg\*

## Controlled thaw

Thaws 70kg of food safely from frozen to +1/+4°C in typically 7 to 10 hours.

Interest-free credit available over 24 months **ZERO%** (UK only)

\* Supplied with guide rails suitable for Rational Combi Pro and I Combi models

## Specifications

Configurations	 BCT15	 BCT22	 BCT38	 BCT52 / BFT48	 RBCT20-60	 CT75KG

Blast chiller/freezer	BCT15-7	BCT22-12	BCT38-18	BCT52-26	-	-
Dedicated Blast freezer	BFT15	BCT22	BFT38	BFT48***	-	-
Controlled thaw	-	-	-	-	-	CT75KG

\* RBCT20-60 available as either integral (with condensing unit) or remote (supplied for connection with remote condensing unit). \*\* Depth includes 55mm spacer to rear. Also allow 55mm for handle protrusion. \*\*\* Requires a 400/50/3 electrical supply (16A).

### The BCT Range – Blast Chillers with occasional freeze capacity

Foster's upgraded range includes an occasional freeze capacity, denoted by the suffix of the product code:

**BCT38-18**  
**BCT = Blast Chiller Touchpad**  
**38 = 38kg blast chilling capacity**  
**18 = 18kg occasional blast freezing capacity**

The range is said to have 'occasional freeze' capacity as there is no integrated defrost system, meaning users needing to blast freeze on a regular basis should choose the dedicated BFT range. The range offers a chilling capacity of +70°C to +3°C in less than 90 minutes within specifications.

### The BFT Range – Dedicated Blast Freezers

Foster offers a dedicated blast freezer range, with a freezing capacity of +70°C to -18°C in less than 240 minutes within specifications.

**BFT38**  
**BFT = Blast Freezer Touchpad**  
**38 = dedicated 38kg blast freezing capacity**

It should be noted that the BFT range can also operate as a blast chiller if required.

## Available options

### Cabinet models specific

Hydrocarbon  
Refrigerant

Our patented shaped ice cubes last longer, giving your customers the ultimate drinking experience.

Ice Machines

FOSTER

# Ice Machines

A range of ice makers using cutting edge technology so the ice is crystal clear and lasts longer in customer's drinks

- Seven ice cuber models with a range of outputs from 25 to 290kg.
- Patented shaped ice is much less inclined to stick together in the ice maker, is harder and lasts longer.

Interest-free credit available over 24 months **ZERO%** (UK only)

**Patented shaped ice**  
is much less inclined to  
stick together in the ice  
maker and is harder.

The spray system  
**produces crystal clear  
ice cubes**, which last  
longer in cold drinks.

Innovation

Ergonomic food safe retractable lid  
ensures easy access to the ice.

Front ventilation system

Front ventilation system allows  
a significant energy saving and  
means the ice maker fits perfectly  
into narrow spaces.

- Quick and efficient coldroom installation minimising disruption to the end user
- UK manufactured coldroom**, designed and made in our purpose built King's Lynn factory
- Full UK service coverage
- Full project management**
- 12 months **parts and labour warranty**
- Suitable for ambient temperatures up to 32°C
- White laminate finish to exterior and interior
- Safe, non-slip, rigid, galvanised floor as standard on all freezer rooms
- Lockable, hinged door comes complete with internal safety release handle
- 3 tier nylon shelving offered as an option on all models

# Ultra Range

The Foster Coldstores Ultra range of tailor-made coldrooms represents the pinnacle in environmentally-friendly walk in refrigeration. The Ultra coldrooms are infinitely adaptable and utterly foodsafe. This range has been designed with operator use, energy, and performance in mind ensuring all aspects of the coldroom suit the operation and energy goals of the client. The latest technology has been designed into the Ultra range providing unrivalled performance.

- **Ultra low energy coldrooms** saving up to 30% in energy costs vs. industry standard
- Designed and manufactured in the UK and **built to last** in the hardest working environments
- Low transport carbon footprint
- Low energy LED lighting
- Low energy evaporators
- Energy-efficient insulated door curtains
- 98% recyclable
- 100mm high density foam insulated panels (43kgm<sup>3</sup>)
- 100mm door insulation for energy efficiency
- Semi rebate, positive sealing doors
- Door closure assist devices
- Optional door open alarm
- Optional foamed in micro switches

Door closure assist device

Insulated door curtain

Low Energy Evaporators: By using EC fan motors, we have been able to increase efficiency from lower power usage. The additional benefit is a reduction in heat generated within the room.

The Ultra Coldroom is easy to maintain and clean and comes with:

- 2 year parts and labour warranty
- Low GWP refrigerant options
- Low noise condensing unit
- As little as a one year energy payback

Ultra low energy coldrooms saving you up to 30% vs. industry standard

The Refrigeration Experts

## Gamko's portfolio of commercial drinks refrigeration encompasses our unique blend of innovative spirit and precision engineering.

Gamko was founded over 60 years ago in a barn in the Netherlands, and since then we've revolutionised the professional drinks cooling industry.

Our interest-free credit offer allows you to spread payment over 12, 18 or 24 months, with no deposit, fees or catches! (UK only). Plus a three month payment holiday!

Innovation is at our core, like our award-winning +stayclear condenser - a great example of how we're always looking to raise the bar in refrigeration.

Our bar design experts are on hand to help you, with free site surveys and Flexbar designs to your specification.

Gamko are accredited to ISO 14001, the recognised international standard in Environmental Management Systems, and ISO 9001, the benchmark for Quality Management Systems.

We're part of ITW, a Fortune 250 company, a world leading manufacturer with a \$2.6 billion food equipment division specialising in refrigeration, warewash, cooking and service - so whatever your need, ITW has you covered!

# Bar design

Your dream bar, designed exactly how you want it

We can advise you on the equipment you will need, the functionality, look and feel of the bar, and how to make it as energy efficient as possible, without compromising on quality.

A unique and tailored Gamko bar is characterised by:

**Reliability** – peace of mind about the longevity of the cooling systems

**Distinctiveness** – your bar has a stylish and recognisable look and feel

**Functionality** – the bar design allows bar staff to be highly efficient and effective

**Energy efficiency** – energy costs will be kept to a minimum

**Repeat custom** – additional revenues through an experience that keeps your customers coming back

A close-up photograph of a bartender with long brown hair, wearing a dark blue shirt, pouring a golden liquid from a large, clear glass pitcher into a glass. The background is a bar with various bottles and warm lighting. A semi-transparent dark box with white text is overlaid on the right side of the image.

## MAXIGLASS

With larger capacity, brighter lights and more energy saving features, the best just got better.

# MAXIGLASS Bottle coolers

Chill more. See more. Save more.

- ◇ Market leading capacity on a minimal footprint - nearly 10% greater capacity compared to the previous market leading Maxiglass range.
- ◇ Vertical LED lights for a beautifully illuminated glass display area, encouraging impulse purchases.
- ◇ With up to 30% energy savings compared to the previous range, the MG3 is one of the greenest bottle coolers on the market.

**Available in 3 heights, multiple widths and with hinged or sliding doors**, meaning there's a Maxiglass to suit every need.

**Innovative flat shelving design** ensures no more 'wobbly' bottles, meaning effortless stocking and retrieval of drinks.

**Superior storage capacity** in its class. The MG3 range can store between 143 and 480 bottles!

**Top mounted doors locks** as standard for keeping your contents safe and secure.

**Two dimmable vertical lights** with even illumination to show the drinks in a desirable light, inspiring impulse purchases.

**Upgraded low maintenance condenser** design reduces the need to clean, and means your product doesn't have to work as hard.

## The green machine

Our most popular Maxiglass products have a one piece fully foamed shell which significantly improves temperature performance, maintaining the cold air for longer, reducing your energy bills.

## A view from the top

The controller is positioned at the top of the Maxiglass to avoid accidental damage, and drinks spillages from within the cabinet.

## Space saving

When space is at a premium, why not choose a sliding door model?

## Another bright idea

Maxiglass features a new vertical LED light per door section, so bright, we had to engineer a dimmer switch.

## Introducing increased Bottle capacity

The Maxiglass range has outstanding capacity and can store between 143 and 480 bottles. Large capacity bottle coolers mean that you won't need to restock as often, saving time for your staff and limiting door openings.

### MG3/150

181x 250ml bottles or  
143x 330ml bottles

### MG3/300

310x 330ml bottles

### MG3/250

The Refrigeration Experts

Groundbreaking capacity  
and exceptionally low  
energy usage is the  
backbone of our E3 range.

**E3**

# E3 Bottle coolers

Enhanced storage capacity, superb energy efficiency

- ◇ With superior storage, one three door E3 can hold 127 more bottles than two standard two door bottle coolers, and all on a smaller footprint.
- ◇ The E3 range is available with drawers, a sleek addition which can make your bar easier for staff to use.
- ◇ Temperature range is adjustable from +2°C to +18°C giving you the flexibility to store white wines, red wines, beers and ciders.

**TotalChill technology** means there are no 'hot spots' so all bottles and kegs are cooled equally, and customers are consistently served cold drinks.

**Superior storage capacity** of up to 722 bottles – making 'bottling up' more efficient for bar staff and allowing for faster service.

**Reduced energy usage** – over 60% more energy efficient than our previous range meaning you aren't just saving money, you're also investing in an environmentally responsible product.

**Powerful refrigeration system** means you can fill the E3 up and drinks are at the right temperature for the next shift.

**Add drawers to your E3 bottle cooler** and you will not only create a practical bar layout, but also a sleek and ergonomic one!

## Environmentally friendly

All our bottle coolers use environmentally friendly and energy efficient R600a hydrocarbon refrigerant.

## Safe and secure

Locks come as standard on glass door models, and are optional for solid doors.

## Refrigeration to suit you

Available as plug ready or remote.

## FLEXBAR

The options are endless with our modular bar range, so you can have a bar unique to you.

# FLEXBAR

Design your new bar just the way you want it.

- Flexbar allows you to have greater flexibility and choice. Whether you want a straight, curved or round bar, pass through segments or barista station, our experts can design your bespoke bar layout.

**Our highly experienced team** will be with you every step of the way, managing the project so you don't have to.

**Over 140 modules to choose from**, meaning that we can help you create your dream bar, unique to you. The options are endless, with different finishes, four temperature zones, drawers or doors!

**Specialist designers create free bespoke drawings** based on your specifications, so you can see your design come to life.

**Easy to assemble camlock system** – reduces installation time so you can start using your Flexbar straight away.

**Central electronic locking system (CELS)** for securing the bar at the end of a shift.

**Coloured and white EQUAL LED lighting** – creates a unique atmosphere - you can even sync this to your sound system.

# Creating your perfect bar in 5 simple steps

Follow our 5 easy steps to design a unique bar tailored to your space.

**Step 1. Choose your design** – with Flexbar, you can have straight, curved or custom

Straight

Curved

Custom

**Step 2. Select your machine unit, spec and finish** – do you want remote or integral? White and RGB lights and our CELS locking system? Anthracite or stainless steel?

**Step 3. Add your refrigerated storage segments** – choose between doors or drawers.

**Step 4. Enhance your design with the finishing touches** – endless customisation includes ambient storage, counter top coolers, glass frosters, barista and cocktail stations.

**Step 5. Send your sketch or wish list to us** – we'll design and price your dream bar.

Available options

**FLEXBAR**

– your bar, your way

Our Flexbar allows you to have greater flexibility and choice. Whether you want a straight, curved or custom bar, pass through segments or barista station, our experts can design your bespoke bar layout.

### Curved Flexbar

Special insulated corner pieces are used when building a round or curved Flexbar configuration to allow the cold air through, and are precisely custom-made to the desired radius.

### Flexbar eQuip

eEquip your bar with unique graphics to blend in or to stand out.

### Pass throughs

Gamko have created pass through segments (with a door either side) so that the bar can be served from 2 sides. This means that the bar is used more creatively.

# Glass frosters

Specially developed for rapid freezing of drinks glasses.

- ◇ Ultra-efficient cooling system, within a few minutes you will have access to frozen glasses.
- ◇ Helps make a showpiece of your bottles and glasses!

## Attractive display

Anti condensation technology prevents condensation and provides an attractive display of bottles of spirits and liqueur.

**Stainless steel** finish with glass or solid door.

**Anthracite** finish with glass or solid door.

## Award-winning

**+ STAYCLEAR SC**

Our award-winning condenser – revolutionising the efficiency of refrigeration. Fitted to our plug ready glass frosters as standard.

## Specifications

GF3/100

Dimensions (w x d x h) mm	600 x 538 x 840/880*
Pint glass capacity	50
Finish	Anthracite or stainless steel
Adjustable shelves	2
Temperature	-10/-14°C

loader for bottles

Ideal for **quick service**

Perfect for **counter top or inseting**

For **chilling or freezing**

## Flexibility

The VKHC/10 model can be built-in or built-on to the worktop and has a maximum capacity of 10 bottles. The VKHC/12 model has been developed to be built into the work top and has a capacity of 12 bottles.

# Keg Coolers

Quickly achieve the correct beer temperature and best taste experience.

- ◆ Premium quality range of plug ready undercounter keg coolers and modular keg coolers

## Concealed installation

The panel construction keg coolers are specially developed for concealed installation and/or in difficult-to access places.

**Plug ready** (no separate condensing unit required).

**Can be fitted under a tap** and python lines can be inserted on models with machine units on right and left.

A Gamko machine unit is always fitted on top of a modular cooler for **optimal distribution of cold air**.

Panel construction keg coolers are supplied as **ready-to-assemble panels**.
