

Professional products by Foster Refrigerator are designed to meet the highest quality demands of foodservice caterers, and this is underpinned by a robust free warranty package with every unit purchased.

The term of the warranty begins on the date of purchase, at which point you will receive a warranty and service document, which you can store for your records.

Warranty agreements are product-based, meaning that each purchased product (cabinet, counter etc.) will have separate warranty periods relevant to the product type. For information on the warranty available for Foster Refrigerator products, please see the table below:
